

WP2 – Programme Integration

D2.1 Report on establishment and procedures of SCB and foundational WGs

Publishable summary

The NEURONET Coordination and Support Action (CSA) has the main objective of setting up an efficient platform to boost synergy and collaboration across the IMI projects of the Neurodegenerative Disorders (ND) portfolio, assisting in identifying gaps, multiplying its impact, enhancing its visibility and facilitating dovetailing with related initiatives in Europe and worldwide. The deliverable D2.1 Report on establishment and procedures of SCB and foundational WGs constitutes a report on the steps and procedures followed for establishing NEURONET's Scientific Coordination Board (SCB) and Working Groups (WGs), detailing their scope, membership and procedures.
